

Access Database

USING MICROSOFT ACCESS

Brief

The aim of this project was to create a sample database using Microsoft Access and join tables to form relationships between them.

The theme of the project was to build a database for a gym. As such five tables were created: Bookings, Classes, Instructors, Members and Memberships. Tables were joined with common keys to allow for relationships between tables.

Four forms (Class Booking, New Class, New Instructor and New Member) were created to allow for ease of input into the database and to create a user friendly appearance for members and staff.

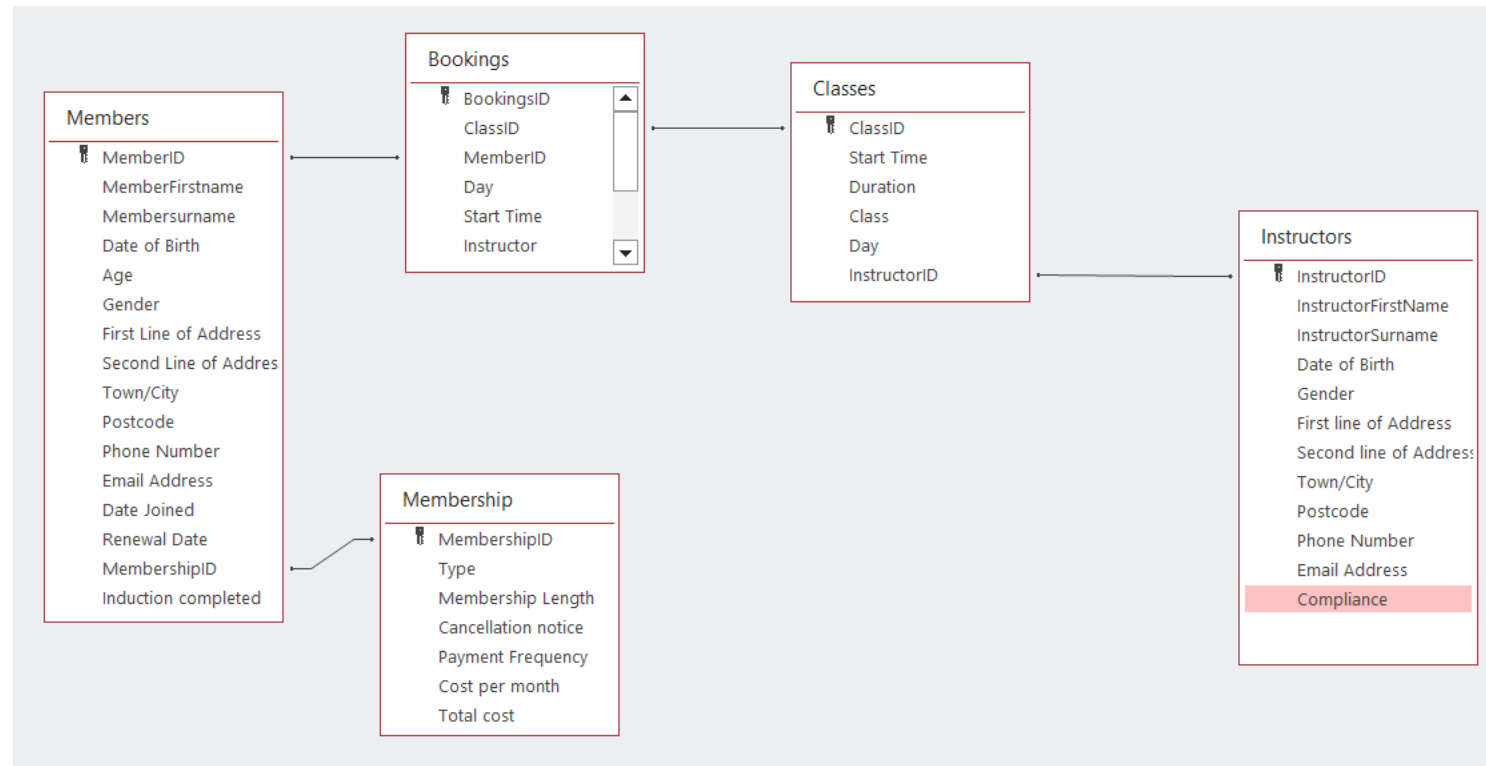

Finally, four queries (Attendance Analysis, Class Roster, Instructor Schedule and Member Booking) were created using SQL joins between tables to allow for reports to be generated

Tables

Bookings		Classes		Instructors		Members		Membership	
Field Name	Data Type	Field Name	Data Type	Field Name	Data Type	Field Name	Data Type	Field Name	Data Type
BookingsID	AutoNumber	ClassID	AutoNumber	InstructorID	AutoNumber	MemberID	AutoNumber	MembershipID	AutoNumber
ClassID	Short Text	Start Time	Short Text	InstructorFirstName	Short Text	MemberFirstname	Short Text	Type	Short Text
MemberID	Short Text	Duration	Short Text	InstructorSurname	Short Text	Membersurname	Short Text	Membership Length	Short Text
Day	Short Text	Class	Short Text	Date of Birth	Date/Time	Date of Birth	Date/Time	Cancellation notice	Short Text
Start Time	Short Text	Day	Short Text	Gender	Short Text	Age	Short Text	Payment Frequency	Short Text
Instructor	Number	InstructorID	Number	First line of Address	Short Text	Gender	Short Text	Cost per month	Short Text
Class	Short Text			Second line of Address	Short Text	First Line of Address	Short Text	Total cost	Short Text
MemberFirstname	Short Text			Town/City	Short Text	Second Line of Address	Short Text		
MemberSurname	Short Text			Postcode	Short Text	Town/City	Short Text		
InstructorID	Short Text			Phone Number	Short Text	Postcode	Short Text		
				Email Address	Short Text	Phone Number	Short Text		
				Compliance	Yes/No	Email Address	Short Text		
						Date Joined	Date/Time		
						Renewal Date	Date/Time		
						MembershipID	Number		
						Induction completed	Yes/No

Queries

A screenshot example of the Attendance Analysis query using SQL

Forms

The screenshot shows a web application window titled "New Instructor Form". The header features a dark green background with a stylized tree and the text "Link Omni Gym" in yellow, with a yellow "T" logo above it. Below the header, the contact information "hunter@linkomnigym.fict | 222 555 7777" is displayed. The form contains several input fields for instructor details:

Field Name	Input Type
InstructorID	Text input with a small icon on the left
InstructorFirstName	Text input
InstructorSurname	Text input
Date of Birth	Text input
Gender	Text input
First line of Address	Text input
Second line of Address	Text input
Town/City	Text input

At the bottom of the form, there is a status bar showing "Record: 1 of 7", a "No Filter" button, and a "Search" button.
